

ForeFlight for the Technologically Impaired **CORRECTION** to Date - Nov 15 is correct

ForeFlight is the most used navigational app in aviation today. During this seminar, we will examine the multiple features the app contains including commonly missed features. We will go through each tab in detail and use the flight planning feature to learn how to get the most out of your ForeFlight subscription. Be sure to bring your fully charged iPad with ForeFlight so that you can follow along in real-time.

Directions: From Whitney and Thomas drive west. Cross over the railroad tracks and the airport will be on your right.
